ELIO'S LITTLE DISCOVERIES

The Boat Race on Mill Stream

밀 스트림의 배 경주

나무 · 함께 읽기 · 12장면

Mill Stream ran shallow and quick behind the old stone mill, and its water wheel turned all morning. Elio and Bori set two bark boats on the flat grey stone.

“First one to the bend wins,” said Bori. She placed her plain boat straight in the current, then Elio set his beside it.

Elio’s boat turned sideways at once. It drifted into the small reed patch at the bend and stopped there, tapping quietly against the stems.

Bori’s boat rode the middle of the stream all the way to the bend. Elio pulled his boat back with a long hooked stick, careful not to step into the water.

“Again,” said Elio. Three more times his boat turned and slid into the reeds. At last he put it down hard on the grass and sat beside it.

Bori turned the boat over and looked along its side. The thin mast leaned to the left, and one side of the bark hull was clearly thicker than the other.

“That is why it turns,” she said. “The thick side sits lower and drags in the water, so the boat swings toward it every time.”

They straightened the mast and rubbed the thick side on a flat stone until both sides were even. Small curls of bark gathered around their feet.

The boat sat level in Elio’s paw with its mast straight. “Try it now,” said Bori, and she set her own boat on the water beside it.

This time both boats stayed straight. They slipped past the reeds and ran side by side down the middle of the stream toward the bend.

The two boats reached the grey stone at the bend at the same moment, side by side. Bori laughed and clapped her wings; Elio stared at them.

Elio tied the two boats together with a long blade of grass. “Now they finish together,” said Bori, and they let the pair drift downstream side by side.

함께 발견해요

읽기 전

표지의 나뭇조각 배 두 척과 개울을 봐요. 물에 들어가지 않고 둑에서만 놀아야 하는 이유도 짧게 이야기해 봐요.

함께 읽을 때

배가 도는 장면마다 돛대와 배 옆면을 살펴봐요. 고친 뒤 배의 모양이 어떻게 달라졌는지 비교해요.

생각 나누기

엘리오의 배는 왜 번번이 돌았나요? 마지막에 두 배를 묶은 까닭을 원문에서 찾아 말해 봐요.

생활에서

종이배나 나뭇조각을 띄워 보되 아이는 둑에 서고 물에 들어가지 않아요. 사람이 타는 배나 실제 개울은 이 책의 활동이 아니에요.

관찰과 대화가 이어지는 긴 함께 읽기 원고 초안이에요. 독립 읽기 인증이나 과학 실험 자료가 아니에요.
